Personal Profile

I am a Full Stack Engineer and my main strength is on the Front End. I have experience in Mobile & Web Development, and Business Analysis and Marketing. Strong communications skills, attention to details, enthusiasm and willingness to learn are some of my personal attributes and soft skills. I am a recent graduate of a Bachelor of IT with a major in Mobile Applications Development from the Academy of Information Technology (AIT). Mixing my experience in Business Analysis and Marketing with my knowledge and passion for Web & Mobile Development I can both develop the solutions and find the best approach on the business side of the solution.

Career Profile

- Junior Full Stack Engineer with a strong background in Business Analysis and Marketing.
- Experience in both Start-up and Corporate environments.
- Commercial experience working with Agile Software Development, Angular 1 & 2, Ionic2, JavaScript, PHP, HTML5, CSS, OOP, SOA, REST, MySQL, PostgreSQL, GitHub, Bitbucket, Adobe Experience Design and Adobe Photoshop.
- Familiarity with AWS (Amazon Web Services), CI/CD, Java and Objective-C.

Career Achievements

- iAwards 2016 NSW and National winner with the final project in my Bachelor of IT. After these awards I secured a place in the APICTA Awards 2016 held in Taipei, where I received a Merit recognition.
- Main responsible for Mapping and Modelling the Processes, Testing and the Training of a HR Online System for the company Prosegur Brazil. Achieved success on the delivery of the project, within time and budget. As recognition of this achievement, was promoted and started to act as the responsible for all the automation projects in the whole Human Resources in the company.
- In the Bachelor of Information Technology have got outstanding grades, reaching a GPA of 79.
